5. VOIP-PSTN TRAFFIC

5.1 General

The VoIP-PSTN Traffic category consists of all traffic that (i) is exchanged in Time Division Multiplexing ("TDM") format and (ii) originates and/or terminates in Internet protocol ("IP") format. See Federal Communications Commission Report and Order in WC Docket Nos. 10-90, etc., FCC Release No. 11-161 (Nov. 18, 2011) ("FCC Order"). Intrastate VoIP-PSTN Traffic services are tarified within the Company's state access tariff consistent with the FCC Order.

5.2 Application of this Tariff

Except where expressly noted, intrastate VoIP-PSTN Traffic is ordered and provided consistent with all provisions of this Tariff, including those in Section 2 – Switched Access.

5.3 Rating of VoIP-PSTN Traffic

Pursuant to the FCC Order, intrastate terminating VoIP-PSTN Traffic will be billed at rates equal to those tarified for the Company's functionally equivalent interstate switched access services as described in Section 2 of the Company's federal access services tariff (MCC Telephony, LLC FCC Tariff No. 1). Consistent with the FCC's clarification subsequent to the FCC Order, intrastate originating VoIP-PSTN Traffic will be billed at rates equal to those tarified for the Company's functionally equivalent intrastate switched access services as described in Section 2 of this Tariff. See Federal Communications Commission Second Order on Reconsideration in WC Docket Nos. 10-90, etc., FCC Release No. 12-47 (Apr. 25, 2012).

5.4 In the event the FCC amends or clarifies its Order in a way that is inconsistent with this tariff, the Company agrees to a true-up based on a final FCC Order.
